

FUNDAMENTALS OF ENERGY-MEDICINE HEALING

*An Introduction to hands-on healing with
Beth Stein, Integrative Healer*

April 19-22, 2018

“In every culture and in every medical tradition before ours, healing was accomplished by moving energy.”

- Albert Szent-Gyorgi (1937 Nobel Prize Winner)

Sponsored by: The Bodhi Tree Center for Healing Arts, Carson City, NV

Our bodies are living systems of energy that are inherent to the health and wellbeing of our physical, emotional, mental and spiritual Selves. As ancient as it is contemporary, the study and practice of Energy Medicine utilizes the body's innate matrix of subtle energy to aid in the healing of its Self. We can train to skillfully apply our conscious perception and intention to direct this organic process, both within our own systems and to serve as a non-intrusive aid to others. This seminar is an opportunity to become familiar with the foundational components of your personal, living energy system. You will also learn techniques to apply your new awareness to help promote a vibrantly healthy energy system in others. There is no pre-requisite learning required to attend this seminar. Individual skill levels will be met by instruction that will further each participant's personal learning level. This seminar stands as a pre-requisite for continued study in Energy Medicine with Beth Stein. The seminar curriculum includes:

- Functional anatomy of a living energy system; chakras, the aura, energy channels, energy movement, energy fields
- Sensory awareness training to perceive living energy systems
- Practical skills in maintaining personal energy system health
- Training in hands-on Energy Medicine techniques to support a vibrantly healthy energy system in others
- Foundational skills in establishing and facilitating a healing relationship

About Beth Stein

Beth Stein has been practicing and teaching in the healing arts for 40 years. During her life's work, she has utilized her personal gifts as a High Sensitive and Intuitive and brought them to focus on the fundamental expression of Health in all areas of human potential—Body, Emotion, Mind, and Spirit. Beth's skillful knowledge has been gathered from a broad spectrum of academic studies, alternative health research, and spiritual pursuits. Subjects including Alexander Technique, interpersonal communication coaching, consciousness and meditation studies, Quantum Healing, Energy Medicine & Hands-on Healing, Biodynamic Craniosacral Therapy, body-centered psychotherapy, trauma resolution, and vibrational remedy formulation, make up only a partial list of her trainings and certifications. Beth currently practices as an Integrative Healer in Chicago, IL. Chicago was also home to Alexander Technique Teaching Associates, a 3-year certification training program where, during the 1990's, she was the Executive Director and Director of Training. Currently, Beth mentors and supervises numerous newly trained healers and continues to teach Energy Medicine seminars in the greater Chicago area. She has also served as an Advisor to The Bodhi Tree Center for Healing Arts in Carson City, Nevada, since its inception. Her most recent course offering at The Bodhi Tree Center: "What if They Cry? Developing Skillful Practitioner Presence to Clients' Emotional Expression" (September, 2016).
